InboxCA

A product by orelu

PREPARED FOR CA PARESH · OCTOBER 2026

Less chasing for your CA firm. More doing.

One system that reads your client emails, saves every file, fills GST and ITR forms for your team to check, and answers simple requests, so your team can focus on the real work.

Utsav Doshi and Ria Chheda, Orelu

WHERE THE HOURS GO

Where a firm's time goes today

45%*

of an accounting leader's time goes on running the office, not on client work.

With InboxCA

Sorting, saving and typing are done for you.

7 in 10*

accountants say collecting papers from clients takes too much of their time.

With InboxCA

Clients are reminded only for what is still missing.

8 in 10*

say finding files inside their own firm takes too much of their time.

With InboxCA

Every paper is saved in the right client folder.

3 hours*

a week, for each person, is what firms using a similar tool say they save on email.

With InboxCA

Client emails are read, sorted and answered for you.

* From surveys published by other practice-software companies: Canopy (October 2022, 150 US accountants; and its 2024 practice management report) and Karbon (2026, its own customers). All are from outside India. InboxCA's own time savings will be measured at your firm.

TODAY, AND WITH INBOXCA

What changes for your firm

Today	What InboxCA does	In simple words
Too many emails, sorted by hand	**Email assistant (AI)**	Reads client emails, sorts them, and sends clients the papers they ask for.
Files saved and named by hand	**Files saved for you (AI)**	Each file a client emails is saved in that client's folder in your own OneDrive or Dropbox, with a clear name.
Numbers typed again into forms	**Forms ready to file (AI)**	Fills GST and ITR forms from Tally, Excel and PDFs for your team to check.
Files on one disk, open to anyone	**Files kept safe**	Files stay in the drive you already have, linked to InboxCA. Staff can only look; any change needs your OK.
–	**Dashboard**	One screen that shows every client, what is due and what is still missing.
–	**Client list**	All your clients and their details in one place, loaded from your Excel sheet.
–	**Due-date calendar**	Each client's GST, TDS, ITR and ROC due dates, so nothing is missed.
–	**Smart reminders**	Reminds a client only for what is still pending or missing.
–	**Notice alerts**	Alerts you when a tax notice comes by email, with its date once confirmed.

DAY TO DAY

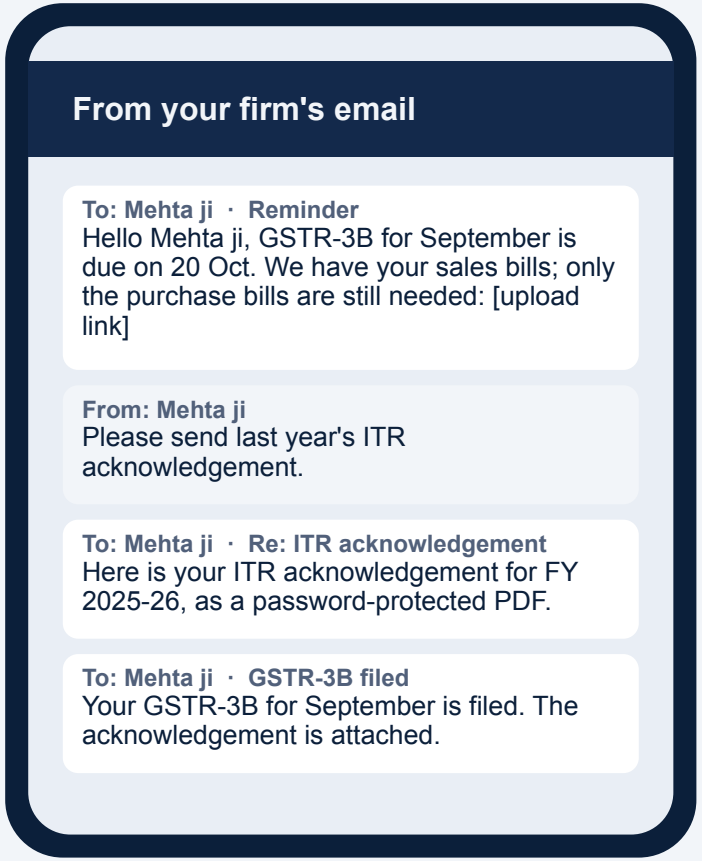

How it works for your firm

1. **Client emails come in**
2. **InboxCA sorts and saves them**
3. **Numbers go into GST and ITR forms**
4. **Your team checks, approves and files**
5. **The client gets proof of filing**

Sorting, saving and typing happen on their own. Each form is saved in the client's folder. Your team corrects it, approves it and downloads it for TaxPower, Spectrum or the government portal.

WHAT YOUR CLIENTS SEE

Your clients hear from your firm by email

Illustration

From your own email address

Every message goes from your firm's own email. You can see it in your Sent folder.

Clients can simply reply

Simple requests are answered at once. Private papers wait for one OK from your team. Anything unusual goes to your team.

Your team replies by email

InboxCA tells you when a reply is needed. You read and reply in your own email. InboxCA keeps no copy.

WHAT YOU SEE

Your whole firm on one screen, every morning

Dashboard

18 Due this week	**3** Overdue	**42** Documents pending
9 Forms to approve	**4** Needs team reply	**6** Notices open

Next deadline: GSTR-3B for September · 20 Oct · 14 clients still to file

Needs your attention

- Kapoor Traders: GSTR-1 overdue by 2 days
- Mehta Textiles: Form 16 still pending
- S.K. Builders: notice reply due in 3 days
- Shah & Sons: GSTR-1 ready for your approval

PEACE OF MIND

You stay in control

What you control	What it means
Keep using your own drive	Link your firm's own OneDrive or Dropbox to InboxCA. Your old files stay there and InboxCA puts them in order. Only you and InboxCA can open them.
You approve what it can do	You see what InboxCA will do with your drive and tick to agree. You can take it back any time.
Private papers need your OK	Routine papers (acknowledgements, challans) go to the client by themselves. Private ones (financial statements, audit reports, PAN, Aadhaar, bank papers) wait for one click. You choose.
Staff work only from your office	One switch: staff use InboxCA only on PCs you approved, in your office, in your hours.
Staff can view, not change	Staff view files and check forms. Any change, download or delete needs your OK.
Deleted files can be restored	A deleted file is kept for 30 days and can be brought back.
Your emails stay with you	Clients hear only from your firm's own email. InboxCA keeps no copy of your emails.
Turn off anything, anytime	Stop reminders for any client, or stop the email assistant, at any time.

PLANS · ESTIMATES · BEFORE GST

Plans side by side, and your estimate

Every plan: unlimited clients and every feature. Pay yearly: 1 month free. 14-day money-back on your first plan payment.

	Solo	Growth	Scale	Enterprise	Custom (yours)
Suits about	**70 clients**	**170 clients**	**340 clients**	**700 clients**	**800–1,000 clients**
Price a month	**₹1,499**	**₹3,799**	**₹7,649**	**₹15,299**	**about ₹19,499**
Price a year (1 month free)	₹16,499	₹41,799	₹84,149	₹1,68,299	**₹2,14,499**
Returns you file in a year	800	2,000	4,000	8,000	**about 10,300**
InboxCA storage in a year	4 GB	10 GB	20 GB	40 GB	**about 54 GB**
AI allowance a month (credits)	4,000	10,000	24,000	60,000	**81,000**
Your whole team, you included	Just you	up to 10	up to 20	up to 40	**up to 40**

Custom plan, for firms bigger than Enterprise: enter your clients, kind of practice and team size on our website and see your price at once.

InboxCA storage: InboxCA's own working space for your client list, records and the numbers it reads from your files. A new file waits there only until its folder is made in your drive, and that wait is not counted.

Your files: they stay in your own OneDrive or Dropbox. Clients are unlimited; "suits about" is only a guide.

Later: if your firm grows, your dashboard shows the new plan and price. One-time setup: about ₹5,080. Extra a month: one more person ₹399, more AI ₹399.

GETTING STARTED · DO IT YOURSELF

Set up online, yourself, at your own pace

Sign up	Sign up and pay on the website. Your InboxCA link comes at once. You choose who can open data, from where and when.
Your client list	Upload your Excel sheet of client names, PAN, GSTIN, phone, email and services. InboxCA checks it and shows rows that need fixing.
Your email	Connect your firm's email in a few clicks. InboxCA tests sending and receiving before it starts.
Your office and hours	If you want, switch on office-only use, say yes to your PCs with one tap each, and set your working days, timings and holidays.
Your team	Add each person with their name and email, your managers and their teams, and two partners who can say yes for you.
Link your own drive	Link your firm's OneDrive or Dropbox: sign in and tick to agree. Files on a hard disk? Copy them into the drive first. Nothing moves until you say yes.
Start using it	Try it with sample data first. Real work starts after the safety checks pass. Each step has a guide; help is one message away, but you can finish on your own.

AFTER LAUNCH

What we plan to add next (future features)

Coming next	What it does for you
Signature expiry alerts	A client's digital signature (DSC) is about to expire? You are told weeks before filing day.
All notices in one list	Every tax notice, with the date the reply is due and who is handling it.
Morning summary	One email each morning: what came in, what is due this week and what is stuck.
UDIN register	Every UDIN in one list, with a reminder before the 60 days run out.
Last year's paper list	Each client's list of papers is made from what they sent last year, so nothing is missed.
Renewal reminders	Licences and registrations that expire: you and your client are reminded in good time.
Due date changes	If the government moves a due date, your reminders move too. Tell clients in one click.

No passwords: all of this works from your firm's email and your drive. InboxCA never asks for a tax portal password or OTP.
Timing: these are planned for after launch. They are not in the first version; we will tell you as each one is ready.

Less chasing. More doing.
